# Dedicated for Rendering of Digital Arts
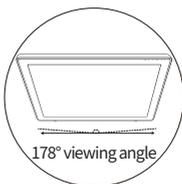

Authentic Color Presentation

Eye-Care Screen with Minimized Blue Light

Application of the quantum-dot technology not only enables 140% sRGB color gamut and vibrant color presentation, but also minimizes the release of harmful blue light.

Pen-On-Paper Drawing Experience

A full-laminated screen can minimize the cursor offset, and a chemically etched glass can alleviate the glare as well as bring a pen-on-paper drawing experience.

AG-glass

1080P Full HD Vision

178 ° wide viewing angle combined with 1920×1080 display resolution enables details to be fully revealed in different directions without causing distortion to imaging and color presentation.
