## Transform any surface into an interactive Touch experience

Imagine **turning a school desk or any flat surface** into an interactive touch table **up to 30 inches**.

However, that's not the end of it! Aim the projector at a wall to create a **touch projection screen of up to 90"** using a pen.

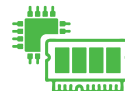

Or, use the traditional projection function for a spectacular screen of **up to 150"**.

## Intuitive HomePage

The access screen (Home Page) of the **MAGIC TOUCH PROJECTOR** is simple, clear and intuitive.

You can access all the main functions of the device with **just a touch**.

# Utilization

## Learning

Magic Touch is designed for **kindergarten and primary schools**, promoting **early literacy** and introducing children to digital technology in an intuitive and engaging way. The apps available on the Play Store allow children to participate in fun and stimulating group activities, introducing them to early learning concepts such as **literacy, numbers and counting, shape and colour association**, and much more. Teachers can engage the whole class with interactive lessons and multimedia content projections.

## Inclusion

Magic Touch is an incredible tool for **inclusion and disability support**, both at **school** and at **home**. It can be transformed into a communicator for people with autism thanks to **Augmentative and Alternative Communication** applications. Activities involving **shapes, images, colours and mathematical games** encourage participation and engagement. It is useful in **cognitive and motor rehabilitation** at any age, thanks to its versatile and customisable features, in educational, therapeutic and professional contexts.

## Entertainment

Magic Touch is a perfect tool for **school and home use**, designed to offer **entertainment and fun** to people of all ages. The applications available in the Play Store engage adults and children with **games and activities** designed **for every age group**, offering tailor-made **entertainment and cognitive stimulation**. You can enjoy classic **board games** such as draughts, chess and cards, **music applications** that simulate instruments such as the piano, and classic **interactive games**.

## Applications installed on the device:

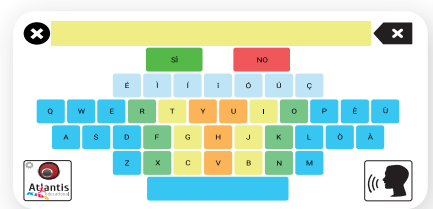

### Classic Keyboard

Multilingual virtual keyboard with resizable keys and characters. Includes layouts for **visually impaired** and **dyslexic users**.

### Talking Keyboard

Multilingual keyboard with integrated speech synthesis, designed to **facilitate communication** for people with **speech difficulties**.

# Educational software

ITALIAN

ENGLISH

MULTILINGUAL

Based on the Android operating system, it provides access to thousands of free and paid applications available in major stores, including the Play Store and Aptoide.

Google play

## Recommended applications:

### Disability support:

Magic Touch can be used as a communicator for autistic people thanks to **Augmentative and Alternative Communication** applications. Other apps allow autistic people to engage in various daily activities, neurocognitive stimulation or create their own visual agenda. Many programmes used in preschool and early childhood education related to **shapes, images and colours, mathematical and linguistic games, or sound and musical activities** can become valuable tools for engaging and including students with disabilities in the classroom or at home.

### Learning

Several Apps on the Play Store promote linguistic, numerical and cognitive development, and are also recommended for the inclusion of students of other nationalities. In particular, Atlantis recommends the free Apps from **RV AppStudios: over 10 titles with more than 70 multilingual activities** for learning numbers, letters, maths, words, shapes, colours, puzzles, drawing, sounds and games.

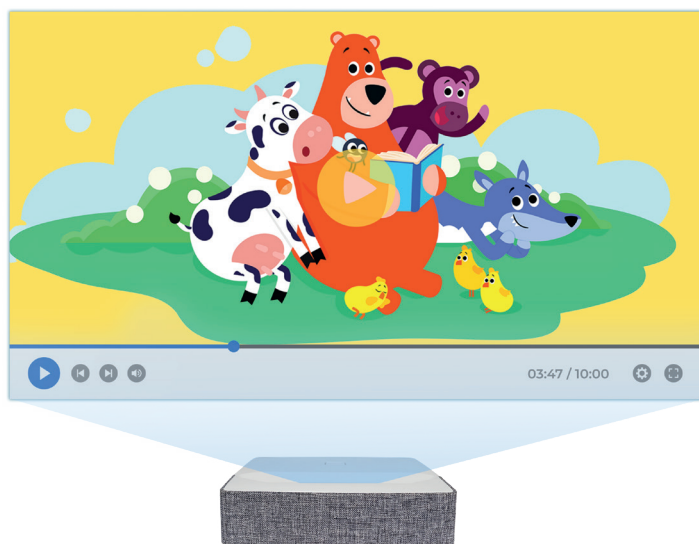

### Entertainment

It can also be used for games and entertainment.

## Mirroring

The integrated mirroring function makes it easy **to share content** from your smartphone or tablet **directly to the projector** (without touch function).

# Projection Mode

## Horizontal

The innovative technology of the **MAGIC TOUCH PROJECTOR** allows you to transform any flat horizontal surface, such as a school desk or a desk, into a **Touch Screen from 24" to 30"**.

CAN BE USED IN ENVIRONMENTS

Normally lit

## Vertical

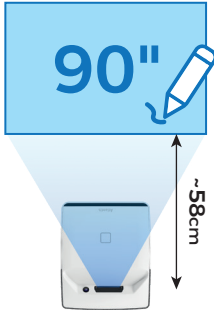

By positioning the **MAGIC TOUCH PROJECTOR** horizontally, you can project your content onto a screen or **wall up to 150"**. With the help of the **Magic Pen**, you can also use the **touch function on a wall-projection (max 90")**.

CAN BE USED IN ENVIRONMENTS

Partially lit

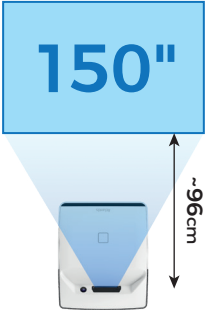

90"

~58cm

Poorly lit

150"

~96cm

# Touch mode

## Finger touch

Finger touch mode allows you to interact directly with the content projected onto the table, just like on a tablet. Thanks to its innovative technology and integrated camera, Magic Touch recognises finger movements and transforms them into precise commands, turning any flat surface into an interactive area.

## Touch with pen

The infrared pen allows you to use the touch function even on a projected wall up to 90 inches.

## Remote control

The supplied remote control works in **two modes: Infrared and Bluetooth**. It allows you to control the device remotely when you do not want to or cannot use the touch function.

APRIL  
2026

The new **optional Eagle Touch** accessory, available from April 2026, allows you to extend the finger touch function **up to 50"** on both tables and walls.

# Powerful performance

## android

The **integrated Android 12** operating system, together with the **Hexa Core microprocessor, 4GB RAM and 128GB FLASH** memory, allows you to run any APP application, whether it be educational, gaming, interactive or simple viewing content.

## Video projection

**MAGIC TOUCH PROJECTOR**, equipped with **Ultra Short Throw Optics** (projection ratio 0.29:1), integrates **DLP projection technology** with a **brightness of 320 ANSI lumens** and offers **high-resolution native FULL HD 1920x1080p** projection, allowing you to project onto a wall with a diagonal of **up to 150"**.

## Lightweight and portable

Its compact dimensions of only **24 x 19.5 x 5.6 cm** and **weight of 1.4 kg** make the video projector an **easily transportable** interactive tool.

## Multimedia

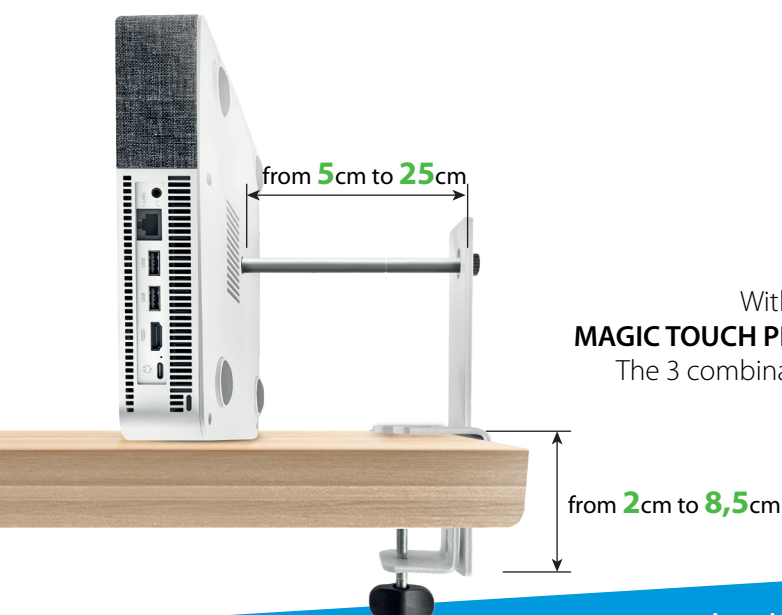

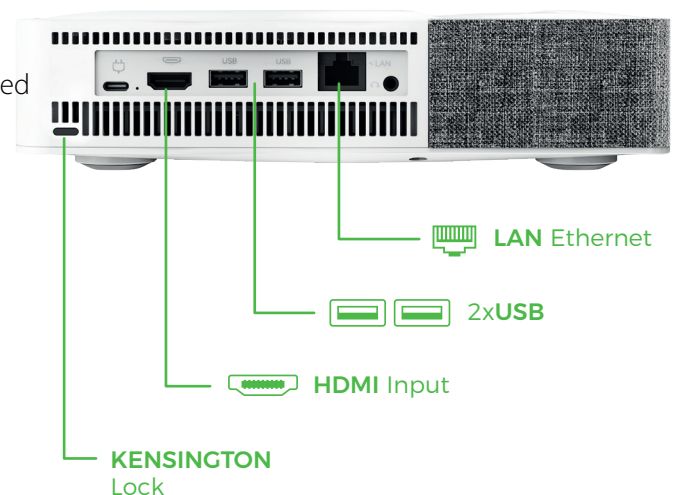

The powerful integrated **8W speakers** allow you to play sounds, music and multimedia content.

## Connectivity

The Android operating system integrated into the **MAGIC TOUCH PROJECTOR** can be connected to the network via **WiFi** and the integrated **Ethernet LAN port**.

The **two USB ports** allow you to connect external peripherals such as a mouse, keyboard, or USB memory stick to the projector.

The **HDMI port** allows you to connect a PC to the video projector and display content directly on the screen (without touch function).

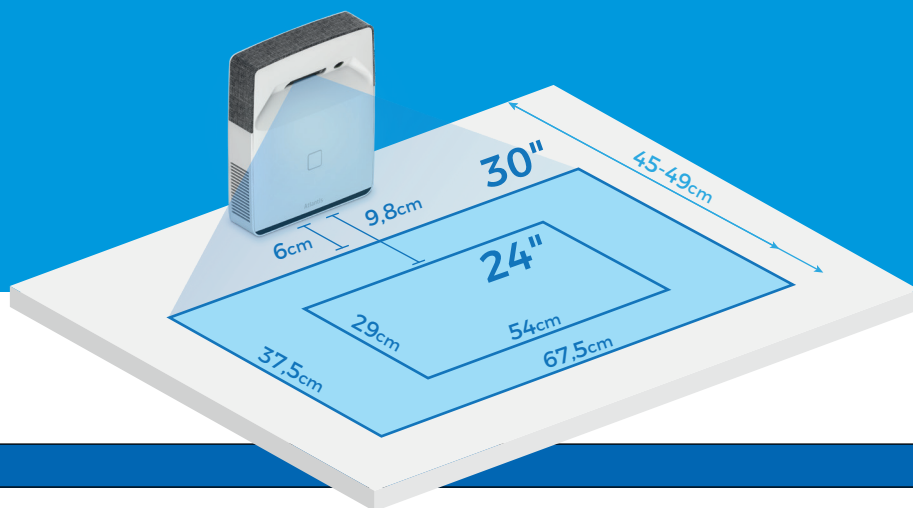

## Bracket

With the included depth-adjustable bracket, you can easily mount the **MAGIC TOUCH PROJECTOR** on any table, **ensuring maximum safety** and stability.

The 3 combinable spacers allow you to adjust the position of the video projector to suit various needs **from 5 to 25 cm** (5 / 10 / 15 / 20 / 25 cm).
